Recommended File Setup

Once the zip files are downloaded, place each one in its respective folder, either on your computer or on a thumb drive at least 256 GB in size connected to your computer system. Using a thumb drive affords portability and is the preferred method. Use a folder structure like this:

Place each downloaded 'SSD 46xx.zip' file in the respective folder for each lesson.

Open the folder. Right click on the .zip file

and select 'Extract All'.

The various files for each lesson are extracted and expanded into a sub-folder of the same name as the .zip file.

Lesson Plan

What follows is the lesson plan for the

entire 12 session series for Social Square Dancing (SSD.) The teaching order is that which is currently outlined by CALLERLAB as of this writing. If you need definitions for the calls, you can download the SSD Teaching Guide from the CALLERLAB website in the Social Square Dancing page

(<https://callerlab.org/download/social-square-dancing-teaching-guide/?wpdmdl=5025&refresh=657cb71e1333b1702672158>)

2	12	Star Thru/ Slide Thru		25	Sweep A Quarter	50		Recycle				

** Calls in **BOLD** are in the Mainstream dance program as well as SSD

Music For Square Dancers

SSD Learning Series

www.musicforsquaredancers.com

The CALLERLAB Social Square Dance program (SSD) is designed as a stand-alone dance program of 50 basic calls. In this series, the calls are spread over a 12-session dance package. Each session is a separate lesson. Using the SSD teaching order and calls as an entry dance program is also feasible, which leads to other dance programs for more experienced dancers. If so, it is recommended that SSD dancers dance SSD for a minimum of one year before moving on to another dance program. The **Music For Square Dancers** website makes the entire SSD learning series available in 12 separate lesson bundles, each containing 4 to 6 learning and dancing tips, including singing calls, or approximately 2 hours of dancing.

All dance files are recorded live with new dancers who are learning the calls for the first time. This results in a high probability of success, and new dancers having fun. There are very few walkthrus in the dance files, so you need someone who can show new dancers how the calls are done.

Support

If you need assistance with use of these files or the SSD program, please contact me.
